**TRITON PCS LICENSE COMPANY L.L.C.  
PHASE II E911 IMPLEMENTATION REPORT  
February 1, 2005**

Triton PCS License Company L.L.C. ("Triton"), by its attorneys, hereby submits its quarterly enhanced 911 ("E911") report to the Federal Communications Commission ("Commission") pursuant to the Commission's decision to afford Tier II carriers additional time to meet their Phase II E911 obligations.<sup>1</sup> In this report, as required by the *Order to Stay*, Triton updates the status of its E911 Phase I and Phase II deployment progress.<sup>2</sup>

**I. STATUS OF PENDING E911 PHASE I AND PHASE II REQUESTS.**

Triton currently operates a wireless network that covers approximately 13.6 million people in Virginia, North and South Carolina, northeastern Tennessee and northern Georgia. This service area covers six major trading areas ("MTAs") and thirty-six basic trading areas ("BTAs"), primarily in rural and secondary markets.

---

<sup>1</sup> Revisions to the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Phase II Compliance Deadline for Non-Nationwide CMRS Carriers, Order to Stay, 17 FCC Rcd 14841 (2002) at ¶¶ 28-31 (hereinafter "Order to Stay"). Tier II carriers are defined as non-nationwide carriers that had over 500,000 subscribers as of year-end 2001.

<sup>2</sup> As required in the Order to Stay, Triton is providing this quarterly report to the Executive Directors of APCO, NENA and NASNA and their counsel.

On December 1, 2004, pursuant to the closing of the first stage of an Exchange Agreement entered into on September 21, 2004 with AT&T Wireless Services, Inc. (“AT&T Wireless”) and Cingular Wireless, LLC (“Cingular Wireless”), Triton transferred PCS network assets held for use in its Virginia markets to AT&T Wireless and Cingular Wireless in exchange for PCS network assets held by AT&T Wireless for use in certain of its North Carolina markets and in Puerto Rico and the U.S. Virgin Islands and the payment by Cingular Wireless to Triton of \$175 million. In addition, the parties entered into leases under which each party has the right to access the PCS spectrum under certain FCC licenses associated with the transferred network assets, pending the transfer of those FCC licenses at a second closing. Triton currently is in the process of integrating the newly acquired markets and converting the divested markets. Once the transition is complete, Triton will operate a wireless network covering approximately 18.3 million people in 31 BTAs. Based on this agreement, Triton expects that this could be the last Quarterly report containing implementation and PSAP data regarding its divested Virginia markets and that the next Quarterly report would contain information for Triton’s legacy markets as well as the newly acquired markets.

Triton continues to make significant progress in its efforts to deploy Phase I location capability services. To date, Triton has 198 requests for Phase I service. Of those requests, 184 are in service and 14 are pending. For these 14 outstanding requests, the following summary outlines their status:

Current Status	Count
PSAP and Triton mutually agree that the PSAP is not ready for various reasons, including LEC, CPE, selective router and database issues or a PSAP is simply not ready to integrate at this time or PSAP has withdrawn its request.	10
Ready to deploy, mutually agreed-upon schedule in place	4
Less than six months old – in planning stages	0
Total	14

For specific details regarding outstanding requests, including details applicable to each request that has been pending for more than six months, please refer to the Appendix to this report.

Triton also is making significant progress towards fulfilling requests for Phase II service. To date, Triton has received 137 Phase II requests. For all of the requests that came due during the preceding quarter, either Phase II service has been deployed or a mutually agreed upon schedule for deployment has been arranged between Triton and the PSAP entity. Accordingly, Triton has met its deployment benchmark for the period preceding this Quarterly Report.<sup>3</sup>

The attached Appendix includes information on all pending requests for Phase I and Phase II service received from individual PSAPs in the format required by the Commission.<sup>4</sup> This Appendix lists the name of the PSAP, the date the request was received, whether or not the request is valid, and the status of the request.<sup>5</sup> To the extent any request has been pending for more than six months, the appendices list specific reasons for the delay, steps taken to resolve the problem, and the anticipated date of full completion of the necessary work.<sup>6</sup>

## II. GSM OVERLAY NETWORK

As outlined in its previous quarterly reports, Triton intends to utilize the network-based TDOA/AOA location solution for its GSM network. Triton is approaching the final phase of integration testing with its network-based location vendor, Andrew, formerly Grayson Wireless, and the implementation of GSM capability within their TDOA/AOA network-based location

---

<sup>3</sup> See Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems, Petition of City of Richardson, Texas, Order on Reconsideration, 17 FCC Rcd 24282 (2002) at ¶ 2 ("Finally, we clarify that nothing in our rules precludes wireless carriers and PSAPs from mutually agreeing to an implementation schedule different from that prescribed by our rules.").

<sup>4</sup> Wireless Telecommunications Bureau Standardizes Carrier Reporting On Wireless E911 Implementation, *Public Notice*, CC Dkt. 94-102, DA 03-1902 (rel. Jun. 6, 2003).

<sup>5</sup> *Order to Stay* at ¶ 29.

<sup>6</sup> *Id.*

equipment. Triton currently expects this integration to be complete during the first quarter of 2005. Triton has begun coordinating individual PSAP testing and expects to begin delivering GSM Phase II services to the first of these PSAPs on or before March 31, 2005.

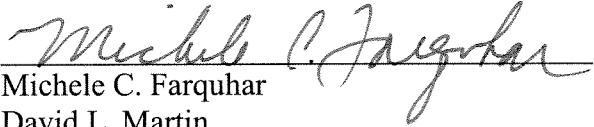

As previously reported, Triton continues to work with Polaris Wireless to extend the capabilities of the Polaris location system to the GSM air interface. The required software and hardware are now in place; however, platform testing and platform verification remain. Triton anticipates this will be completed by the end of the first quarter 2005.

### **III. ADDITIONAL QUESTIONS**

Should there be any questions or if any additional information is required, contact the undersigned.

Respectfully submitted,
